# Metal Wall Going Up Around Mexico Presidential Palace

HAL TURNER | WORLD | NOVEMBER 12, 2025 | HITS: 19734

Real trouble is brewing down in Mexico; the kind of trouble that topples governments. Mexico's (Oy Vey) President, Claudia Sheinbaum, got the word

through Israel: She ordered a solid metal wall be immediately welded into place around the Presidential Palace.

Workers began URGENTLY installing the wall yesterday and have worked all through the night, welding the pieces together.

Word on the street in Mexico is that Sheinbaum was told the US is not merely going to strike Drug Cartels in Venzuela; they're allegedly going to hit them in Mexico, too.

Sheinbaum knows she cannot openly side with the Cartels, and cannot defend against any US Military actions, but the widespread RUMORS say the Cartels own her and will demand she take defense action - which would be futile.

When the Cartels see they're NOT getting cover from the Mexican government, they are likely to move against Sheinbaum to forcibly overthrow her.

Hence, the metal wall.

The **urgency** with which this wall is going up comes just as the USS Gerald R. Ford aircraft carrier and its Strike Group, enter the SOUTHCOM Area of Responsibility (AOR) bringing utterly enormous firepower to a region already seeing an incredible massing of naval assets by the US.

So whatever is going to happen, seems very likely to start - with a bang - very, VERY soon.

Mexico is worried.
